1. Claims 1-12 are present in this application.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No 6,197,308 although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed subject matter of the patent recites as follows:

1. A method of preparing a powder containing oleuropein substantially free of monophenolic compounds from olive pits, comprising

separating olive pits from olives to obtain a pitless olive pulp;

pressing the pitless olive pulp to obtain a liquid-phase mixture including water, oil, and olive pulp components;

separating the water component from the oil and olive pulp components of the liquid-phase mixture to obtain a water component substantially free of oil and olive pulp;

collecting the separated water component, and

drying the separated water component to obtain a powder containing oleuropein substantially free of monophenolic components present in olive pits.

2. A composition prepared according to the method of claim 1 which comprises oleuropein substantially free of monophenolic compounds from olive pits.

Absent unexpected or unobvious process steps or products, the rejection as noted above will be maintained since there is essentially no difference between the claims and the patented claims.

3. **No claim is allowed.**

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
